

## TRADITIONAL SOLID TIMBER SLOOP

This strong, traditional timber vessel, 35 feet LOA with a beam of 11 feet and a 5 foot draft, is powered by a Volvo MD21A 75HP engine and comes with a full suite of excellent sails.

It features a new starter motor, a reconditioned rotary fuel pump, new injectors and a 50 litre stainless fuel tank. Plus many other inclusions, including a Navico 5000 wheel autopilot.

It has been in the care of just one owner for the past 35 years, and the time has come to pass her on to others.

Some repairs are needed, including timber replacement on the starboard deck and cabin, but for a handy person this is a huge bargain.

**\$1,000 negotiable**
