

## CLASSIC SKERRY

This traditional 'Nordic' style dinghy is for sale. Designed by John C. Harris, it is that rarest of small boats that rows and sails with equal affinity. Professionally built using 9mm Okume ply, the hull below the waterline has been glassed and the whole boat epoxy coated & then varnished.

The Skerry comes with two sailing rigs (a Gaff rig with jib and a Sprit rig, the sails imported from the USA), a set of oars with rowlocks, and a detachable outboard bracket. Centreboard and rudder are standard. Specs are: Length 4.5m, Beam 1.37m, Hull Weight 43kg, Draft 13cm.

It sits on an as-new Sea Trail trailer fitted with a winch, spare tyre and new jockey wheel. Trailer has not been on the road other than delivery to the boat club. It has been down the ramp numerous times. It is registered for another 6 months.

The boat is kept covered with a good heavy-duty tarp which keeps it dry and out of the UV.

Selling due to my age and ability.  
Asking well under its real value, \$2,500.
